HKUST

HKUST is the third publicly-funded university in Hong Kong. It was incorporated in April 1988 and opened in October 1991 as a world-class technological university dedicated to the advancement of learning and scholarship, with special emphasis on research and postgraduate education. Current student enrollment at the undergraduate, master's and doctoral levels stands at approximately 21,000.

The Campus

The University's campus occupies a 60-hectare of sweeping beauty on the Clear Water Bay Peninsula of Sai Kung. The international airport at Chek Lap Kok is about 45 kilometres from HKUST. Visitors can come to the campus by bus, Airport Express train or taxi. It is about **60 minutes to 90 minutes from the airport**.

Visitors to HKUST are often overwhelmed by the beauty of the architecture in its natural surroundings. But beyond this first impression, the campus reveals itself to be truly functional. Carefully planned facilities such as a well-stocked library with the latest information technology, a high-speed fiber-optic network linking computing resources in all parts of the campus and reaching out to all corners of the world, teaching research laboratories equipped with state-of-the-art instruments and devices are important elements in creating an environment for learning that is quite unique in the region.

School of Business and Management

The School of Business and Management (SBM) of HKUST was established to provide **world-class management education in the Asia-Pacific region**. It comprises of five departments: Accounting, Economics, Finance, Information Systems, Business Statistics & Operation Management, Management, and Marketing. All departments offer undergraduate as well as postgraduate programs to the doctorate level.

Strong emphasis is placed on scientific and analytical methods as the fundamental pedagogical approach, supplemented by the use of case studies appropriate to Hong Kong and its neighboring region. The School takes full advantage of the University's state-of-the-art technological capabilities in its instruction and research.
