## 103 學年度 \_ 商 \_ 學院 英語授課課程大綱

課程名稱	(中文) WTO 專題研究:爭端解決
Course Title	
模組 個別	(英文) Advanced Seminar on WTO Law:dispute settlement
課程目標 Course Objectives	The dispute settlement system in the WTO has played a crucial role in solving international trade disputes among WTO Members at the multilateral level. This course analyzes how WTO Members use such multilateral dispute settlement system in settling trade disputes based on substantive trade rules agreed upon such as the General Agreement on Tariffs and Trade (GATT) or the General Agreement on Trade in Services (GATS). Instead of examining substantive international trade rules, this course focuses on addressing various aspects of procedural issues in the WTO dispute settlement at different stages of consultation, adjudication and implementation. The purpose of this course is to familiarize students with the unique WTO mechanism that underscores the rule-based approach for the solution of trade disputes among WTO Members.
